Dear readers,

We welcome you to the first reprint issue of articles from Journal of Thrombosis and Haemostasis (JTH) translated into Japanese, which is brought to you by Bioverativ. JTH is the official journal of the International Society on Thrombosis and Haemostasis (ISTH), the leading international scientific society in the field of bleeding and clotting disorders. Founded in 1969, ISTH is dedicated to advancing the understanding, prevention, diagnosis and treatment of thrombotic and bleeding disorders. ISTH brings over 4,000 clinicians, researchers and educators together to improve the lives of patients in more than 94 countries around the world. ISTH’s highly regarded activities and initiatives in research, education and standardization include its Core Curriculum, research activities; meetings and congresses, peer-reviewed publications, expert committees and World Thrombosis Day on 13 October. Visit ISTH online at http://www.isth.org/ to learn more.

JTH has a proud heritage as the leading journal in the thrombosis and hemostasis field and is routinely publishing the newest basic research and clinical science in our field. By promoting the diffusion and exchange of information and ideas on an international level, JTH strives to advance science related to thrombosis, bleeding disorders, and vascular biology. It publishes the highest quality original research reports; state-of-the-art reviews; letters and announcements; and invited commentary and debate on timely topics.

We sincerely hope that you will enjoy this collection of selected scientific articles published in our journal, which have conveniently been translated into Japanese. We trust that the information contained in these papers will advance your own scientific research and clinical practice.

We also encourage you to present your own original scientific research at upcoming congresses and to submit it for publication in JTH.

If you are not yet a member of ISTH, we invite you to join so that you can take advantage of the many scientific and educational opportunities our Society provides.

Sincerely,

Editor in Chief
Frits R. Rosendaal, MD, PhD
